

The table below shows the amount of coal mined in the 8 largest coal producing states in 2018.

Ranking	State	Coal production (thousand tons)
1	Wyoming	304,188
2	West Virginia	95,365
3	Pennsylvania	49,883
4	Illinois	49,563
5	Kentucky	39,567
6	Montana	38,610
7	Indiana	34,598
8	North Dakota	29,643

1. Which state has 9 ten thousand?
2. What is the place value of 3 in the number of Wyoming?
3. How many states have 9 thousands?
4. What is the value of 3 in the number of Indiana?
5. Which state has 61 tens?
6. Which state has 40 hundreds?
7. Which states have the same number in tens place and hundreds place?

Answer Key

The table below shows the amount of coal mined in the 8 largest coal producing states in 2018.

Ranking	State	Coal production (thousand tons)
1	Wyoming	304,188
2	West Virginia	95,365
3	Pennsylvania	49,883
4	Illinois	49,563
5	Kentucky	39,567
6	Montana	38,610
7	Indiana	34,598
8	North Dakota	29,643

1. Which state has 9 ten thousand?

West Virginia

2. What is the place value of 3 in the number of Wyoming?

Hundred thousands place

3. How many states have 9 thousands?

4

4. What is the value of 3 in the number of Indiana?

30,000

5. Which state has 61 tens?

Montana

6. Which state has 40 hundreds?

Indiana

7. Which states have the same number in tens place and hundreds place?

Pennsylvania
