

The bar graph below shows how many unhealthy days for children Gibson County had over the last 8 years.

1. In what two years did the children in Gibson County have the largest number of unhealthy days?
2. In what two years did the children in Gibson County have the smallest number of unhealthy days?
3. Use < , > or = to show which year had more unhealthy days.

For example, 2012 2013

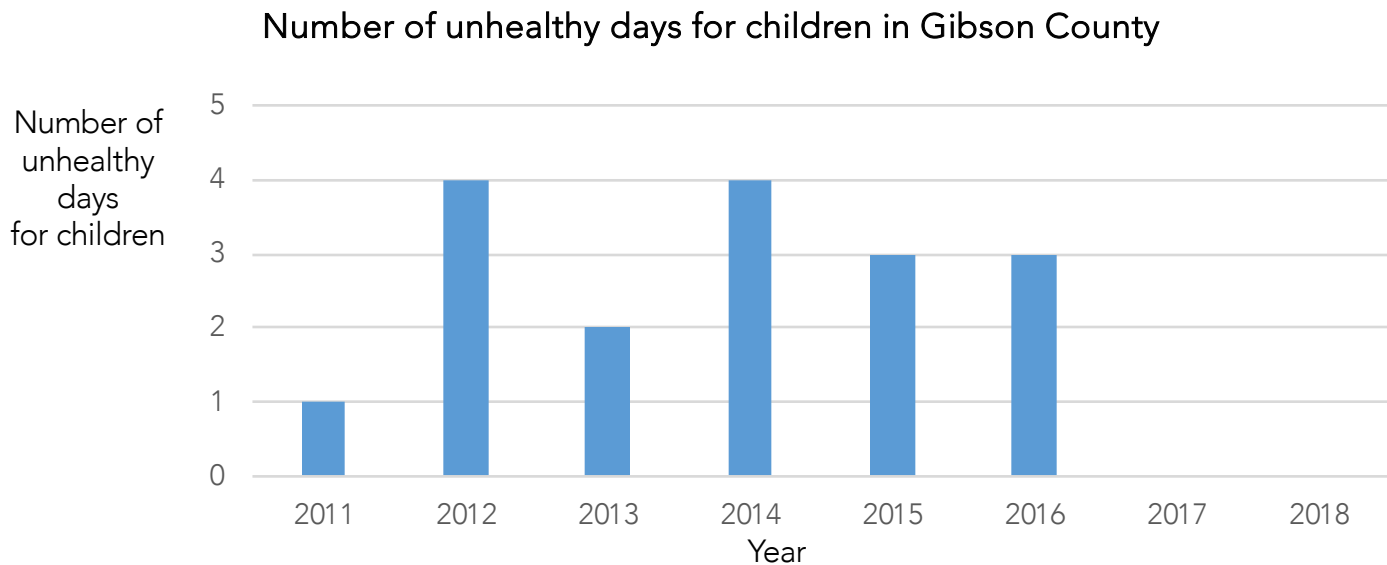

2011

2016

2015

4. What is the difference between the largest number and the smallest number?
5. How many less unhealthy days did year 2011 have than the year 2015?

The bar graph below shows how many unhealthy days for children Gibson County had over the last 8 years.

1. In what two years did the children in Gibson County have the largest number of unhealthy days? **2012 and 2014**

2. In what two years did the children in Gibson County have the smallest number of unhealthy days? **2017 and 2018**

3. Use < , > or = to show which year had more unhealthy days.

For example, 2012 **>** 2013

2011 **>** 2017

2016 **<** 2014

2015 **>** 2018

4. What is the difference between the largest number and the smallest number?

$$4 - 0 = 4$$

5. How many less unhealthy days did year 2011 have than the year 2015?

$$3 - 1 = 2 \text{ (days)}$$
